

TechNote #CM14 VIBXPERT®

Overview of approved memory cards (CompactFlash) (applies to VIBXPERT version 2.20 and higher, non-intrinsically safe instruments)

VIBXPERT is delivered with a 2 GB CompactFlash memory card (manufacturer, type: SanDisk, Extreme III 2GB).

If you wish to use a different card in the device, please note the following:

Only cards that have been approved by PRÜFTECHNIK for use with VIBXPERT may be used (see list below). While the measuring device may function with other memory cards, PRÜFTECHNIK cannot guarantee that it will function properly.

The following CF memory cards have been tested and are recommended for use:

- **Toshiba THNCF1G02DGI / 1 GB**
(every other size is also approved)
- **Toshiba Xtra speed / 64 MB**

- **SanDisk Extreme III / 1 GB**
- **SanDisk Extreme III / 2 GB**
- **SanDisk Extreme III / 8 GB (30 MB/s)**

- **SanDisk 5000 / 4 GB**

- **X4store Industrial Advanced / 4 GB**
(order no. CF-1G0-XIE4)

The following micro hard disk was tested:

- **IBM Microdrive DSCM-11000 / 1GB**
